**Re: Monthly Report for April, 2009**

We recorded 3.6 inches of rainfall in April as compared to 6.8 inches of rainfall in April, 2008. We used 626.7 million gallons (mg) of water for the month, which is 90.2 mg more than April of last year.

Our average usage this April was 20.9 million gallons per day (mgd) or about 206 gallons per person per day (gpcd). For April of 2008, we averaged 17.9 mgd for about 179 gpcd. Our daily water usage ranged from a minimum of 11.7 mgd on April 29 to a maximum of 28.4 mgd on April 8.

The Signs and Markings crews completed the installation of 372 "Share The Road" signs identifying many streets to promote bike safety throughout the city.

Working with the Parks and Recreation Department, utility crews installed irrigation systems at the Fairways lift station and at the Frisco 1 pump station on Custer Road. The Frisco 1 pump station project provides screening for the subdivision adjacent to the pump station site and included about 500 feet of wrought iron fence with 14 stone columns, 10 cedar elm trees, and 70 Nellie R. Stevens shrubs.
